Copper is strong at 18½ cents for lake, with spot scarce and lead weak at \$4.55, but tin is quoted at \$31.55, London leading as usual.

Manufacturers have been buying much wool, it is said, but less the past week, although many are taking sample bales. Goods are in fair demand, but no further change in prices is mentioned. Sales in four weeks have been 46.779.500 pounds, of which 38,364,800 pounds were domestic. In 1897, with a new tariff coming, speculation took 46,105,200 pounds, normal consumption being about half that quantity.

Cotton goods are stronger for bleached, and the general tone is good in spite of cheap cotton. Shipments of hours and shoes from the east in four bleached, and the general tone is good in spite of cheap cotton. Shipments of boots and shoes from the east in four weeks have been 384,375 cases, against 365,535 cases last year, and in 1895, the nearest previous year, 351,359 cases. Leather continues strong and scarce, with a combination of packers lifting prices of hides at Chicago so that many of the takers are quitting that market. Railroad business for July showed the largest increase of any month this year, 16.1 per cent larger than last year and 10.4 per cent larger than in 1892.

ing the Past Week.

York, July 28.—Bradstreet's financial review will say: Speculation inancial review will say: Speciation is still without important movements, and the activity of trading on the stock exchange has been at a low ebb all week. The professional traders supply nearly all the actual interest, the public is taking little part, and the pools and large operators rest while these conditions exist. London has not been a factor, and the market there and abroad is experiencing the usual midsummer dullness. As far as the railroad share list is concerned, the favorable crop prospects and the large increases in current earnings reported by some important lines, to say nothing of confident predictions that tomage will continue heavy during the remainder of the year, keep up a steady to strong tone, and facilitates short-lived railies from time to time. This process has been particularly noticeable in connection with the grangers and southwestern stocks. A few of the specialities have been the objects of manipulation, and even the industrials shared to some event in the buillish influences. The hast named portion of the market, however, on the whole, is neglected.
